

MANDATORY ORGANICS AND FOOD WASTE RECYCLING

The California Senate Bill (SB1383) requires single family home residents and multifamily complexes to participate in a food waste collection program. Customers will now be required to place their food waste, landscaping waste, and food-soiled paper (100% fiber-based) into their green waste container.

WHY?

SB1383 targets the reduction of methane emissions from landfills. Landfills are the third largest source of methane in California. Organics waste emits 20% of the State's methane.

WHAT IS ORGANIC WASTE?

Organic waste includes food waste, yard trimmings and 100% fiber based food soiled paper. Food waste will now go into your green container, which include: meat, fish, dairy, fruit, vegetables, breads, and pasta.

- Pet waste
- K-cups
- Diapers or wipes
- Cactus plants
- Dirt & rocks
- Concrete
- Glass
- Metals
- Liquids

No plastic bags! Only food-soiled paper: napkins, towels, and tissues. 100% (fiber based) compostable packaging.

COLLECTING YOUR FOOD SCRAPS

- 1** Collect food waste (including leftovers) and food-soiled paper in a food waste pail or container such as a coffee canister or large yogurt tub. A container with a tight-fitting lid is recommended.

- 2** Empty the contents of your food waste pail into your green cart, when it's full.

- 3** Set your green cart on the curb on your regular collection day.
